EDUCATION

Amrita Vishwa Vidyapeetham University, Coimbatore
B.Tech Computer Science & Engineering (CGPA of 8.57)

2023 - 2027

Velammal Bodhi Campus, Madurai

Grade 12, CBSE, Science with Computer Science (92.4%)

2022 - 2023

Queen Mira International School, Madurai

Grade 10, CBSE (94.6 %)

2020 - 2021

EXPERIENCE

NullClass | Web Application Hacking Intern

Krishnagiri, TamilNadu

- Successfully identified and reported a critical Open Redirect vulnerability in a live e-commerce site. Performed vulnerability assessments, manipulated HTTP traffic, and discovered hidden directories.
- Completed OWASP Top 10 training and applied it in real-world bug bounty and CTF-style tasks.

PROJECTS

DeepVerify: Zero-Trust Interview Integrity Gateway (Ongoing) | *Python, FastAPI, Scapy, MediaPipe* |

- Engineered a multi-modal forensic engine that eliminates interview fraud by fusing PRNU (hardware fingerprinting), rPPG (biological pulse detection), and Network Jitter analysis to verify the physical and biological origin of video streams.
- Designed a hybrid "Axiom Engine" to correlate neural gaze tracking with browser-level event monitoring, generating a Continuous Trust Score to detect deepfake injections and off-screen cheating in real-time

CareerForge | AI-Powered Placement Analytics & Decision Support | *Next.js, MongoDB, Groq API, Gemini AI, Docker* |

- Built a real-time AI interview system using Groq API to analyze student profiles and deliver instant performance insights along with an Agentic AI Headhunter Module.
- Developed predictive gap analysis models to compare user skills with industry hiring trends and generate adaptive career roadmaps.
- Designed data dashboards and a MongoDB-backed data pipeline to track placement readiness scores and student progress.

SkillVault | Peer-to-Peer Skill Sharing & Time Banking Platform | *MERN, WebRTC, Socket.IO, Google Gemini AI* |

- Engineered a full-stack platform enabling users to teach and learn skills via a credit-based time banking system, with real-time WebRTC video sessions, secure credit reservation and transfer, and AI-powered live transcription.
- Implemented optimistic locking and session state machines to ensure atomic, concurrency-safe transactions and seamless real time collaboration.

SecureCare Plus – An AI Induced Enterprise Healthcare Management System | *React, Node.js, Express, MongoDB, Gemini API* |

- Engineered a GDPR/HIPAA-compliant healthcare platform utilizing Role-Based Access Control (RBAC) to enforce secure data handling across Patient, Doctor, and Admin portals along with AI Driven Security Anomalies detection for the Admin's dashboard.
- Implemented a patient-driven consent management workflow with instant 403-blocking enforcement and a centralized audit trail for Electronic Health Records (EHR).

CERTIFICATIONS

The Complete Cybersecurity Course - Volume 1 (Stationx)

- Major topics covering encryption, anonymity, malware, and core security principles. Built a clear conceptual foundation before moving into hands-on cybersecurity work.

Google Cybersecurity Professional Certificate – Foundations of Cybersecurity (1/8)

- Introduction to the basics of cybersecurity, including threat types, risk management, and security roles. Developed a solid starting point for understanding how cybersecurity teams operate.

ACHEIVEMENTS & RESEARCH

- Ocean Depth Estimation Research Paper** - Ongoing Research
 - Developed a Satellite-Derived Bathymetry (SDB) system using Sentinel-2 multispectral imagery and polynomial regression (degree 3) to achieve R^2 values up to 0.877 for nearshore depth estimation
- Class Representative during my First Year at my University.
- Part of the Student Council at Queen Mira International School as a Minister of Information & Broadcasting.
- Received the prestigious Scholar Badge Award in the 4th, 6th, 7th & 8th standard along with the Ignited Mind Award resulting in receiving the Blue Blazer.
- Received the Shining Star Award for excellence in academics during my 11th standard at Velammal Bodhi Campus, Madurai.
- Represented my school (QMIS) in the IIMUN 2019 Mock Parliament.
